CONTEST RULES AND INFO

Model your Watershed Contest

I,	, as parent or guardian of the minor		
	, a participant in the Guam Environmental Protection		
Agency and Environmental Education Committee	ee's Earth Day 2013 contests, understand the		
following:	•		

ARTWORK SUBMISSION INFORMATION

- MODEL OF YOUR WATERSHED: The goal of this contest is to create a display that shows a healthy watershed in Guam, preferably in your village. Judges will look for displays that demonstrate understanding of what a watershed is, and creatively shows activities that promote healthy watersheds.
- Enriching the information represented in the watershed with information provided by multiple sources is encouraged.

CONTEST RULES

- All works submitted must be original work and submitted by elementary or middle school students.
- The watershed model must be built by the students represented in the registration form.
- The watershed model can be built out of anything but using biodegradable and sustainable materials is recommended. Nonperishable and food items are not allowed.
- The base of the model can be no larger than 18 inches by 12 inches. The model cannot be taller than 20 inches.
- The model should demonstrate, at a minimum, the following concepts: 1) How water flows through the watershed. 2) One activity that improves the watershed and the water in the area. 3) One activity that protects the watershed environment from harm.
- The watershed model should include at a minimum five labels. These labels should be typed and explain the different parts of a watershed.
- The student's name, age and school should be included on the work itself, along with the registration form. If more than one student has worked on a model, all students names, ages and the school should be included somewhere on the model itself.
- There is no charge to enter this contest.
- Students may work individually or as a group, but each student within the group must submit an
 individual entry form with signatures from adults for the model they work on. Ideally the model will be
 submitted with one clearly-labeled packet of entry forms from each student who worked on the model.
- Schools are encouraged to select the best models to enter into the contest.
- Submissions become property of the Guam Environmental Protection Agency and the Guam
 Environmental Education Committee. Through submission of the work, contestants and their legal
 guardians grant nonexclusive reproduction and publication rights to the works submitted. Entries will
 not be returned.

JUDGING CRITERIA

Judges will assign scores to each entry based on the following questions. 1) Does the model include
the major concepts of a watershed including ridge, water flow, and coastal areas? 2) Does the model
use research to support the way a healthy watershed would look? 3) Is the model easy to understand
and well-labeled? 4) Is the work original in style?

I have read and hereby unde	rstand the contest rules and information present	ed here.
